

Quantitative Easing (\$QE)

The Future of Crypto Liquidity

Introduction

Quantitative Easing (\$QE) is a Binance Smart Chain token created to bring financial strength and sustainability to the decentralized crypto space. It represents a movement - built on transparency, secure liquidity, and real token utility for long-term holders and believers in decentralized finance.

Tokenomics

- Total Supply: 1,000,000,000 QE
- Presale: 500,000,000 QE
- Locked Liquidity: 300,000,000 QE
- Team/Marketing Reserve: 200,000,000 QE

Roadmap

See the visual roadmap at <https://quantitativeeasing.org>

Launch Plan

The QE token will launch via PinkSale. Presale investors will gain access to the token before it is listed on decentralized exchanges. All liquidity will be locked to protect investors and ensure long-term trust.

Utility and Rewards

\$QE will be used for staking, governance, and liquidity mining in the future. Rewards and airdrops may be distributed to long-term holders and active community members.

Security and Transparency

Liquidity is locked, and smart contracts will be audited (or pending audit) to ensure protection for all participants.

Team

The QE project is led by a team of crypto enthusiasts and DeFi advocates committed to long-term growth and sustainability. The team may remain anonymous to prioritize the community and product

integrity.
